David Smith, Chief Forest Warden for Appomattox County, displays one of the signs that will be posted along-side highways in the area to keep the public aware of the "Outdoor Burning Law" which will go into effect March 1, 1973.

Outdoor Burning Law In Effect

The Outdoor Burning Law, the law requiring safety in burning brush, trash, and other debris, becomes effective March 1.

David Smith, Chief Forest Warden for Appomattox County, said the law, known sometimes as the 4:00 p.m. law and the brush burning law, actually applies to the burning of any materials in the outdoors.

The regulation, designed to reduce the number of escaped grass and forest fires requires that burning of any materials or debris, can be done only between the hours of 4:00 p.m. and 12:00 midnight if the fire is in or within 300 feet of forestland, brushland, or other inflamable material. The law is in effect from March 1 through May 15 of each year.

Morris, coach at ACHS for the past two years, said it has been a tremendous year, "I felt that we had the material to go all the way, but I had no idea we would go undefeated in the District."

Also receiving honors in the district were Bobby Layne, on the left, and Leon Robinson, on the right, holding the Championship Trophy and net from the goal that the Raiders cut down in a victory celebration.

Layne, a senior playing first string Varsity forward for two years, was named to the all-tournament team on Friday night. Layne has done an outstanding job for the Raiders all season. He was the starting Quarterback for the Raider football team as well.

$50 Million Plant To Be Built At Riverville

Last week Governor Linwood Holton announced that Virginia Fibre Corporation, a newly formed company, would build a major paper mill at Riverville in Amherst County with construction slated to begin soon.

The new manufacturing facility will be a semi-chemical pulp and paper mill which will manufacture corrugating medium for the container industry. The design capacity of the mill will be 625 tons a day, 220,000 tons a year. The Riverville plant will be situated on a site of approximately 1,150 acres.

Company spokesmen have stressed that all Federal and Virginia State air and water pollution requirements will be met or exceeded at the new facility.

In the design of this facility the most modern pollution control equipment has been included which will conform to all federal, State and local regulations.

A spokesman for the Division of Industrial Development, who has worked with the company, stated that preliminary engineering work for the facility has been completed. Construction of the plant is expected to begin soon and start-up of the mill is scheduled for early 1975. The company indicated tentative future expansion plans.

The paper mill will employ some 150 persons, mostly in Amherst County, in a highly automated plant. Indirect employment will be created in Buckingham, Appomattox and Nelson Counties.

The total financial requirements are approximately $50.0 million. It was pointed out that this will be an independent mill, not affiliated with any paper manufacturing companies or corrugated box manufacturers.

Robert C. McCauley of Key Biscayne, Fla., a veteran of many years in the industry, is the founder and chief executive officer.
